POLY COMPOSITE DRUM

Type	Tight-head drum
Nominal volume	202 l/205 l
External height	884 mm
External diameter	585 mm
Closure	2 x BCS56x4
Hazardous goods certification	6HA1/X2/300
Weight	20,8 – 27,6 kg

OUTER DRUM BODY MADE OF STEEL

Steel thickness combinations

- 1,0/1,0/1,0
- 1,2/1,2/1,2

Lacquer-coated

Galvanized steel top plate

INNER BOTTLE MADE OF PLASTICS

- Extrusion blow-moulded, high-purity HD-PE
- Weight: 3 kg (205 l)/6 kg (202 l)

G3/4 ADDITIONAL BUNG

- G3/4 bung for releasing air trapped between the PE inner bottle and the steel drum

NEW!

Steel drums with plastic inner bottles.

The new Poly Composite drum combines the benefits of two packaging worlds:

- Stability, safety and permeation protection of steel packaging.
- The cleanliness, zero corrosion and chemical resistance of plastic packaging.
- Particularly suitable for filling goods with a high safety requirement – e.g., highly permeating, aggressive or corrosive substances

Please do not hesitate to contact us regarding any technical concerns or questions.
